SUMMARY

Full Stack Developer with 1 year of experience building production-grade web applications using React, Node.js, and MySQL/MongoDB. Delivered ERP systems, admin dashboards, and scalable REST APIs with JWT-based authentication, alongside independent AI-integrated projects (speech-to-text pipelines, automated resume generation). Focused on clean architecture, performance optimization, and end-to-end ownership from frontend to backend.

EDUCATION

- **K.C.T Engineering College** Kalaburagi, India
Bachelor of Engineering in Computer Science (CGPA: 7.97/10)
Courses: Operating Systems, Networking, Databases *May 2021 - July 2025*
- **SS Tegnoor College** Kalaburagi, India
12th Grade; Percentage: 84 *July 2019 - May 2021*

SKILLS

- **Language:** JavaScript, Python
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, TypeScript, Material UI, Redux
- **Backend:** Node.js, FastAPI, Middleware, REST APIs, JWT Authentication
- **Database:** SQL, MySQL, MongoDB
- **Tools:** Git, GitHub, Vercel, Postman

EXPERIENCE

- **KcGlobEd Pvt. Ltd.** Gurgaon
Full Stack Developer *July 2025 – Present*
 - **Full Stack Development:** Developed and maintained production applications including an ERP System (React, FastAPI), GCC School Website (Next.js), GCC Admin Panel (React, Node.js), and InstaLearn, a Udemy-like learning platform.
 - **Feature Development:** Built scalable features, reusable UI components, and business workflows using React.js, Next.js, Vue.js, Node.js, and MongoDB.
 - **API Integration:** Integrated RESTful APIs to enable secure, seamless communication between frontend and backend services.
 - **Optimization:** Enhanced application performance, resolved production issues, and delivered high-quality, user-focused solutions.

PROJECTS

- **MeetingMind**
AI-Powered Meeting Analysis Application
 - **Full Stack Development:** Built a full stack application using React for the frontend and Node.js backend to handle audio uploads, manage API endpoints, and process large audio inputs efficiently.
 - **AI Integration:** Integrated OpenAI Whisper for speech-to-text transcription and transformer-based models for automated meeting summarization and emotion analysis.
 - **Processing Pipeline:** Designed an end-to-end processing pipeline from audio upload to transcription, summarization, and structured insight generation without using a database.
- **SettleUp**
Group Expense Splitter with Role-Based Access
 - **Full Stack Development:** Built a full stack group expense-splitting application using React, Node.js/Express, and MongoDB with a modular, scalable architecture.
 - **Authentication & Access Control:** Implemented JWT-based authentication with access/refresh token rotation and backend-enforced, per-group role-based access control (Admin, Member, Viewer).
 - **Expense Engine:** Designed a flexible splitting engine supporting equal, exact, and percentage-based splits with server-side validation, and built accurate net-balance calculation logic across group members.

VOLUNTEER EXPERIENCE

- **Hackathon Participant – KCT Engineering College**
Campus Event Manager Application (2nd Place in College Hackathon)
- **Mentor – Peer Coding Sessions**
Guided first-year students in web development, understanding programming fundamentals and mini-projects
